

WHAT IS CLAIMED IS:

1. A baseball-style cap with a tubular sweatband comprising:
 - a crown main body having a plurality of panels;
 - a visor portion secured to a forward portion of said peripheral edge of said crown main body and extending outwardly therefrom;
 - a sweatband sewn along said lower peripheral edge of said crown main body, said sweatband made of a fabric portion woven to form a tubular channel.
2. The cap as set forth in claim 1, wherein said sweatband is woven with spun thread.
3. The cap as set forth in claim 2, wherein said spun thread is a material having quick perspiration absorbency.
4. The cap as set forth in claim 1, wherein said sweatband is sewn along longitudinal edges to provide a guideline for attaching said sweatband to said crown main body.
5. The sweatband as set forth in claim 4, wherein said sewing along said longitudinal edges includes two substantially parallel lines of stitching.

6. A sweatband for use with baseball-style cap comprising a fabric portion woven to form a tubular channel such that two layers of said fabric portion provide moisture absorbency without a need for sewing to join the two layers.

7. The sweatband as set forth in claim 6, wherein said sweatband is woven with spun thread.

8. The sweatband as set forth in claim 7, wherein said spun thread is a material having quick perspiration absorbency.

9. The sweatband as set forth in claim 6, wherein said sweatband is sewn along longitudinal edges to provide a guideline for attaching said sweatband to a crown main body of said baseball-style cap.

10. The sweatband as set forth in claim 9, wherein said sewing along said longitudinal edges includes two substantially parallel lines of stitching.
